

SR-14.....

The Astro Vac SR-14 power unit features a powerful, 5.7" 2-stage flow thru motor with 725 maximized airwatts.

Inverted Bag Filtration It comes standard as a cyclonic inverted bag unit, but has a special stem that allows it to use an optional sealed paper bag. The inverted bag provides a permanent filter.

Optional Paper Bag The optional paper bag is a two-layer disposable paper bag for superior filtration. The bag has an inner liner which adds longer life, as well as more strength and resistance to bursting. This liner also serves as an electrostatic barrier. These paper bags are also inexpensive and easy to throw away, making vacuum maintenance easy.

Durable Construction The SR-14 is constructed from rolled galvanized steel and powder coated for a tough, corrosion-resistant lifetime of use.

Improve Allergy Symptoms As with all of our Astro Vac central vacuum systems, using the SR-14 can help decrease asthma and allergy symptoms by removing dust and allergens from your living areas. Vacuuming with these vacuums provides a powerful, efficient cleaning job that will rid your home of these allergy-triggering irritants.

SR-14 Single Piece Power Unit	
MOTOR	5.7" 2-Stage Flow Thru
VOLTAGE	120 A.C.
MAX AMPS	15.0
MAX AIR WATTS	725
AIRFLOW (CFM)	133
SEALED VACUUM (inches H₂O)	145
FILTRATION	Cyclonic Inverted Bag w/ Optional Sealed Paper Bag
SOUND LEVEL	58 db
UP TO TOTAL SQ. FEET	6,000
DIRT CAPACITY	25 Qt.

Features & Benefits:

- 5.7" 2-Stage Flow Thru Motor--Powerful Motor with **725 Maximized Airwatts!**
- Conversion Stem--Allows unit to use optional paper bag filtration.
- Utility Valve Located on Front of Power Unit--Adds convenience by allowing you to plug directly into the power unit.
